

Brand Integration Technology™

By imageMessenger

imageMessenger provides integration technology that seamlessly transforms ordinary messaging systems into powerful branding and marketing platforms. We help ecosystem partners monetize their mobile messaging platforms without the risk of alienating users or compromising their users experience. Our collaborative approach builds trust, loyalty, and lasting connections between brands, consumers, and providers. Brand Integration Technology™ (BIT) seamlessly integrates brands within normal daily chats, pictures, and video shared between friends.

Unlocking The Revenue Equation

Messaging is the most popular form of communication used today. Its wide use and unique characteristics presents a vast, yet mostly untapped revenue opportunity. Implementing the right strategy can mean the difference between huge success and steep failure. Our technology and precise business strategy holds the key to unlocking the revenue equation!!

A Proven Winning Combination

A proven method that presents a winning combination for all stakeholders, including; users, brands, and providers!!

Cohesive

A cohesive approach that keeps users in control. By opting-in they receive exclusive offers, specials, discounts, AND earn rewards for participating.

Unleash the power of our technology through custom implementation. From integrating with existing systems, to building new enterprise applications from the ground up - we've got it handled!

Contact us today, and let's talk strategy!!
